

# SAHAJANAND INTERNATIONAL SCHOOL

## Disaster Management in Sahajanand International School

**2019-20**

Creating a safe environment for the children in school is the most important task. National Disaster Management Authority, of the Ministry of Home Affairs, strongly feels that there has to be a structural, as well as non-structural intervention, to ensure the safety of the children. Sahajanand International School adopts a school safety programme. Under this programme, the students learn about safety measures, thus becoming future disaster managers, while a disaster resilient society is built by way of educating the community.

Some of the activities we perform for educating the children are:

1. Building awareness by Teacher's talk
2. Conducting drill on use of fire extinguishers
3. Conducting sessions of self defense for girls
4. Conducting mock drills for fire disasters and earthquakes
5. First aid training
6. A clear picture of command and control, so that in case of an emergency there is no chaos
7. The students will be given some tips as to how to behave in a hostage situation
8. We educate the child; as per the age, teach the child the difference between good touch and bad touch.

Convince the child, no matter what, our love for them is unconditional.

Keep the child's childhood safe
