

SAHAJANAND INTERNATIONAL SCHOOL

DISASTER MANAGEMENT 2021-22

Creating a safe environment for the children in school is the most important task. National Disaster Management Authority, of the Ministry of Home Affairs, strongly feels that there has to be a structural, as well as non-structural intervention, to ensure the safety of the children. Sahajanand International School adopts a school safety programme. Under this programme, the students learn about safety measures, thus becoming future disaster managers, while a disaster resilient society is built by way of educating the community.

Some of the activities we perform for educating the children are:

- Building awareness by Teacher's talk.
- Conducting drill on use of fire extinguishers.
- Conducting sessions of self-defense for girls.
- Conducting mock drills for fire disasters and earthquakes.
- First aid training.
- A clear picture of command and control, so that in case of an emergency there is no chaos
- The students will be given some tips as to how to behave in a hostage situation
- We educate the child; as per the age, teach the child the difference between good touch and bad touch.
- Convince the child, no matter what, our love for them is unconditional.
- Keep the child's childhood safe
